N°393 SPECTRO-3 series

## Instruments

## 1. Presence control of a Velcro® strip on rear shelf

The presence of a Velcro® strip on a hat shelf should be controlled. For this purpose a color sensor type SPECTRO-3-FIO-SL in connection with an optical fiber type R-S-A3.0-(3.0)-1200-67° and an optical frontend type KL-M34-XL-A3.0 are used. The distance of the frontend to the hat shelf is approximately 100mm and the spot size at this distance is around 6mm. The presence of the Velcro® can be proper detected as shown in the screenshots.
