Laser Information

The laser transmitters of L-LAS-LT-50-SL-... sensors comply with laser class 1 according to EN 60825-1. Under reasonably foreseeable conditions a class 1 laser is safe. The reasonably foreseeable conditions are kept during specified normal operation. The use of these laser transmitters therefore requires no additional protective measures.

The laser transmitters of L-LAS-LT-50-SL-... sensors are supplied with a laser information label „CLASS 1 Laser Product“.

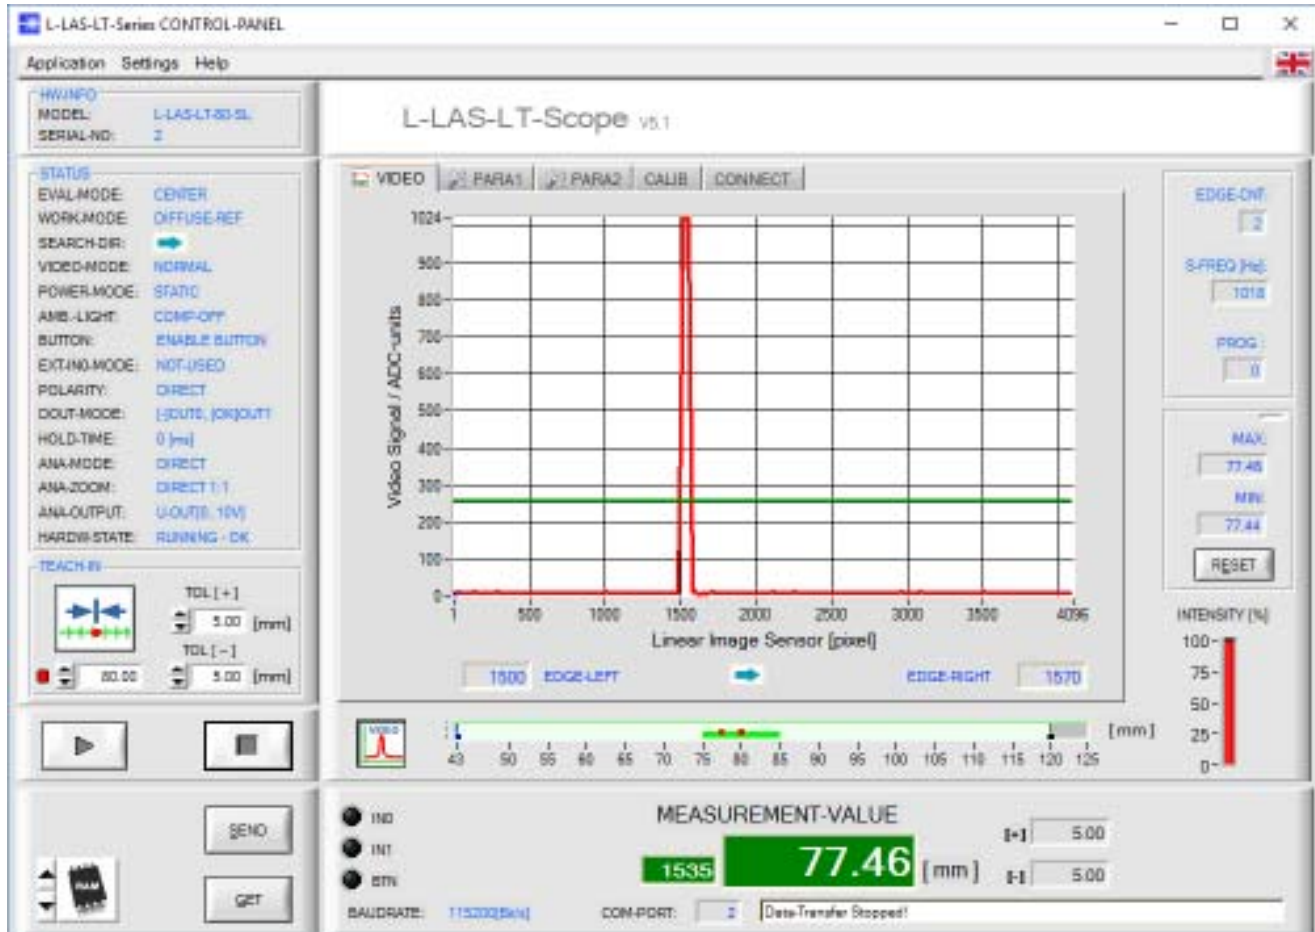

**Parameterization**
**Windows® user interface:**

(The current software version is available for download on our website.)

The L-LAS-LT-SL sensor can be easily parameterised with the Windows® user interface L-LAS-LT-Scope (as of V5.1). For this purpose the sensor is connected to the PC with the serial interface cable cab-las4/PC (or with USB cable cab-/USB or with Ethernet converter cab-4/ETH). When parameterisation is finished, the PC can be disconnected again.

With the help of the L-LAS-LT-Scope software the following settings can be made at the sensor:

- Setting of laser power and type of automatic power correction
- Polarity of digital outputs
- Different evaluation modes
- Start of the teach process by software button
- Setting of tolerance ranges for monitoring the measured value
- Setting the exposure time: For particularly dark or matt surfaces, increasing the exposure time can help to ensure that sufficient intensity reaches the receiver line again  
Increasing the exposure time reduces the scan frequency of the sensor (e.g. 0.5ms => 2000Hz, 5ms =>200Hz)
- Setting the video speed: Switch for specifying the readout speed on the line sensor receiver.  
Increasing the readout speed reduces the resolution on the L-LAS-LT sensor:  
NORMAL (normal readout frequency = full resolution) or FAST (fast readout frequency = half resolution)

Furthermore, various numerical and graphical measured quantities can be visualized with the L-LAS-LT-Scope software. For example, the raw data of the CCD line sensor can be displayed graphically and numerically.
